About Me

Artificial Intelligence and Data Science undergraduate with a strong foundation in software development, mobile application development, and full-stack web technologies. Experienced in building scalable solutions using Flutter, React, Node.js, Firebase, and SQL databases. Passionate about open-source collaboration, problem-solving, and developing impactful technology products that enhance user experiences.

Education

Bachelor of Technology in Artificial Intelligence and Data Science SIES Graduate School of Technology, Mumbai CGPA: 8.91 Semester 4 SGPA: 9.14	2024 – 2028
Diploma in Computer Science and Engineering V.P.M's Polytechnic, Thane Percentage: 90.74%	2022 – 2025

Technical Skills

Languages: Dart, Java, Python, JavaScript, SQL
Frontend: HTML5, CSS3, Tailwind CSS, React.js
Mobile Development: Flutter
Backend: Node.js, Express.js
Databases: MySQL, PostgreSQL, Firebase
Tools & Technologies: Git, GitHub, Postman, VS Code, REST APIs
Core Concepts: Data Structures, OOP, DBMS, SDLC

Experience

iFuture Technologies, Thane Web Development Intern	June 2024 – July 2024
- Assisted in the development and maintenance of responsive web applications using modern frontend technologies. - Collaborated with developers to implement UI enhancements and improve website functionality. - Participated in debugging, testing, and deployment activities to ensure application reliability. - Gained hands-on experience with software development workflows and version control systems.	

Projects

TrustMetric React.js, Node.js, Blockchain	GitHub
- A full-stack AI-powered financial trust scoring platform built for individuals without traditional credit histories. - Implemented analytics and visualization features to provide actionable insights from user data. - Designed scalable frontend and backend architecture for secure information management.	
Language Creeper Flutter, Dart, Firebase	GitHub
- Built a gamified coding-learning application to improve user engagement and learning outcomes. - Implemented challenge-based progression, achievement tracking, and performance monitoring features. - Designed intuitive mobile interfaces focused on accessibility and seamless user experience.	
ResourceBridge React.js, Node.js, Firebase	GitHub
Developed a centralized platform connecting users with resources and opportunities efficiently.	

- Built responsive interfaces and backend services to streamline resource discovery and management.
- Enhanced usability through structured workflows and scalable system design.

DevCollab

- Built a collaborative platform that enables developers to connect, communicate, and work together on projects.
- Implemented features for project collaboration, resource sharing, and team coordination.
- Designed an intuitive interface focused on improving developer productivity and collaboration.

Open Source Experience

GirlScript Summer of Code (GSSOC) 2026

- Selected as an Open Source Contributor for GSSOC 2026.
- Contributing to community-driven repositories through issue resolution, feature development, and pull requests.

Social Summer of Code (SSOC) 2026

- Selected as an Open Source Contributor for SSOC 2026.
- Collaborating with maintainers on real-world open-source projects and code enhancements.

Leadership & Activities

- Active participant in hackathons, open-source initiatives, and collaborative software development programs.
- Regularly showcase technical projects and development progress through GitHub and LinkedIn.
- Engaged in continuous learning across mobile development, web technologies, and software engineering.

Achievements

- Top 7 Finalist in National-Level Hackathon (**HACKVIOUM**).
- Selected for GirlScript Summer of Code (GSSOC) 2026.
- Selected for Social Summer of Code (SSOC) 2026.
- Built and deployed multiple full-stack, mobile, and web-based applications.
